

AMPELITE

Solasafe Polycarbonate.
Your UV Safe
Window to the Sky.

Enjoy the freedom

'Solasaft' polycarbonate sheeting provides 9 lifestyle, and selecting the best roofing so physical properties that can't be match three levels of polycarbonate

Level One 'SOLASAFE'

The most widely used Solasaft Polycarbonate sheet. Seven colours with varying light and heat transmission ratings.

When you want maximum light Solasaft Clear sheeting lets 90% of available light flood your space. Truly, 'your window to the sky'. Integral surface protection prevents UV degradation of the sheet surface and helps prolong its life. It also minimises

yellowing of the sheet over its lifetime; see the generous warranty that covers this. The impact strength of polycarbonate is up to 250 times that of tempered glass, strong enough to resist damage from even heavy hail. See the warranty for details.

Level One

of outdoor living sa

99.9% protection from harmful UV rays that cause sunburn and skin damage. Outdoor family and ch
olution is the first step to ensure you get the maximum benefit from your investment. Polycarbonate i
ned by other materials. Adding an outdoor room to your home can enhance your family life and add
arbonate sheeting to choose from. A level to suit your needs and climate. A colour to suit your home

Level Two

'SOLASAFE' Comfort Range.

In designer colours that transmit less heat but allow plenty of soft light to pass through. More comfort.

Without doubt polycarbonate is by far the most preferred transparent/translucent roofing product throughout the world. In some situations a degree of heat control may be required, and in this regard 'Solasafe' Level Two sheeting offers a good

solution. The designer colours – Smooth Cream and Mist Green reduce the amount of heat passing through the sheet, but still transmit ample light. The sheet is just as tough and long lasting as other Solasafe products, and protected by the same warranty.
